About University

The Conception of the Children's University was first revealed by the then Honorable Chief Minister of Gujarat and present Hon. Prime Minister Shri Narendrabhai Modi, while emphasizing this he explained the urgent need for the growth and development of the future generation. A Part from this, as He pointed out, the prime focus of this institution would be to avail the path-breaking researches dealing with the children's studies. The prime aim is holistic development of child based on Indian thinking and spirituality which covers whole life span of human that is conception to adulthood (9 months to 18 years) which make this university very unique, novel and path breaking from all other conventional universities. This is very proud feeling matter for the government of Gujarat to work in the area of child development in very different way.

About Departments

Department of Prenatal Care and Education

Children are the creator of bright future. Physically healthy, radiant in mind and intellect, full of inner strength, such children will become the best citizens of the Nation and they will create the Great Nation of Twenty-First Century. For such holistic development of children Hon'ble Prime Minister and the then Chief Minister of Gujarat Shri Narendra Modi has established Children's University which ensures to provide all needed help and care for the integral development of the Child.

Tapovan is its first step towards this new endeavor which would provide Prenatal Care and Education. Because education must begin at prenatal stage and education must continue right through the whole life. Thus the expectant mothers have a very unique role to play in this progress of human evolution.

Department of Home Science

The Home Science Department is one of the important units of the Children's University reflecting the vision and mission of the university. The department is an integral part of the school of nutrition and health. The department has been functioning since 2018 with an aim to nurture the students and help them transform into competent professionals in the field of food and nutrition. The department believes in all-round development of its students by providing them quality academic, research and field exposure; and arranges various academic, research and the extension activities accordingly. Home Science is vast and varied field. Its scope extends far beyond the 'home' and is not limited to cooking, laundry, needlework, and home decoration. In fact, it is the only subject which prepares young learners for the two most important goals in their lives - looking after their home and family and preparing for a career or vocation in life. The department is currently offering M.Sc. (Foods and Nutrition), PG Diploma in Dietetics, and Ph.D. (Home Science) courses. All these courses are designed in such a way that they align with all the requirements of the government and private sectors institutions working in the areas of food - nutrition and health.
